ABOUT ME

Web developer with knowledge in both frontend and backend, in the process of consolidating myself as an excellent fullstack developer. I am a very self-taught person, always looking for personal and professional growth. I possess strong leadership, adaptability and communication skills, as well as excellent logic and problem solving skills. My main technologies include TypeScript, React, Next.js and Express.js. Although I focus primarily on web development, I also have knowledge in several areas of programming.

TECHNOLOGIES

JavaScript - TypeScript - Java - Python - SQL - HTML5 - CSS - React - Next.js - Express.js - Git - Docker

EXPERIENCE

Frontend & Backend Developer (Proyecto CRM)

Freelance

- Contributed to the development of a CRM as part of a team, participating in both the frontend and backend of the project.
- Designed and developed frontend interfaces using React and Next.js, implementing accessible and responsive layouts from a prototype and consuming API routes to retrieve backend information.
- Built REST API routes with Express.js on the backend to access, process, and filter data from a database.
- Analyzed and cleaned data directly in the database using SQL, optimizing data access and management from the backend.

Private Lessons

Freelance

- Provided independent tutoring sessions in engineering and programming for university students.
- Executed personalized educational sessions for high school students in mathematics and physics.
